Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: element 142 on page 8 is not seen in the Figures. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 5, 7, 17 and 20-27 are objected to because of the following informalities: the first word of the claims is not capitalized.

In claim 20, lines 15-17 the language is unclear in describing the make-up of the lot. It would appear that the lot is dependent only on the movement of the elements longitudinally of said axis in relation to the first member because the second member and the elements are engaged together.

In claim 5, it is unclear if the "object" is being positively claimed. The applicant is requested to note that examination was completed on claim 5 assuming that applicant intends to claim the combination of the puzzle with the object.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Bern (4,632,399).

Regarding claim 20, attention is directed to the basis for the rejection set forth in the first Office Action as claim 20 substantially recites similar limitations to claim 1. Regarding the limitation for a housing that delimits a storage space at one end of the arbor, attention is directed to Figure 8 showing the semi-tubular limiter (77). The limiter includes a housing (84) at one end that combines with an annular element (114) to form a storage space. Unpinning of the elements from the limiter would permit access to the space.

Allowable Subject Matter

5. Claims 5, 7, 17 and 21-27 read over the prior art of record.
